KEY FEATURES

Premium Stainless Steel

Made from high-grade SS for excellent corrosion resistance.

High Load Capacity

Engineered for superior load bearing and secure anchoring.

Easy & Reliable Installation

Quick installation with consistent expansion and strong grip.

APPLICATIONS

Structural & Industrial Installations

Railings, Barriers & Handrails

Machinery & Equipment Mounting

WHY AANURAJ?

Premium Quality

ISO 9001:2015 certified manufacturing with strict quality control.

Trusted Performance

Products engineered for strength, safety & durability.

Customer Centric

Reliable support, on-time delivery & custom solutions.

TECHNICAL DATA

Material	Stainless Steel (SS 304 / SS 316)
Anchor Type	Wedge Sleeve Anchor
Diameter Range	M6 to M24
Length Range	40mm to 200mm
Thread Type	Metric Thread
Surface Finish	Bright / Natural
Corrosion Resistance	Excellent
Applications	Concrete, Masonry, Stone
Feature	High Load Capacity, Secure Grip
Standard	As per International Standards

DIMENSIONS TABLE (All dimensions in mm)

Size (D)	Anchor Length (L)	Drill Hole Dia (d0)	Embedment Depth (h)	Thread Length (T)	Max. Fixture Thickness (tfix)	Tightening Torque (Nm)
M6	40	6	30	12	5	10
M8	60	8	40	16	10	20
M10	70	10	50	20	15	40
M12	80	12	60	24	20	60
M16	100	16	80	32	25	100
M20	120	20	100	40	30	150
M24	150	24	120	48	40	200

Note: Custom sizes available on request.

HOW TO USE - INSTALLATION GUIDE

1 Drill a hole of recommended diameter and depth.

2 Clean the hole thoroughly using brush and blower.

3 Insert the wedge sleeve anchor into the hole.

4 Tighten the nut until the washer is firm against fixture.

5 Anchor expands and grips securely inside the base material.

6 Installation complete. Ready for heavy duty application.

IDEAL FOR

- ✓ Cracked & Non-Cracked Concrete
- ✓ Heavy Duty Structural Applications
- ✓ Indoor & Outdoor Installations
